

Technical Data

CENS digital are custom electronic noise suppressors for shooters of all disciplines. Supplied in pairs and 100% digital, CENS digital facilitate the ability to amplify ambient sounds such as normal speech, but suppress high level gun shots to a comfortable level. Being custom-made to the individual's ear, CENS digital provide excellent attenuation and a very comfortable fit in the ear, allowing the devices to be worn for extended periods without discomfort.

Enhanced low-level gain allows the user to hear traps or quarry, and the unobtrusive design permits mounting of the gun without interference.

CENS digital 1 are general purpose digital electronic noise suppressors suitable for all shooting disciplines, while CENS digital 2 feature two separate programs, optimised for game shooting & clay shooting respectively.

All CENS digital now feature new Tranquill wind/noise reduction system.

CENS Pack

Each pair of CENS digital is manufactured in coloured acrylic (blue for left, red for right), and has the user's name permanently laser marked onto each earpiece.

Each pair of CENS digital is also supplied with a CENS pack wallet (will accommodate shotgun licence), containing user manual, presentation case, soft pocket case (for travelling), cleaning brush and a pack of 6 batteries.
